*Tested in controlled laboratory conditions and meets the IP69 rating according to the IEC 60529:2013 standards. Dust and water resistance may gradually lose effectiveness with extended use beyond normal usage conditions, so please use with caution.

Damage caused by immersion in liquids is not covered by the warranty.

*The battery typical value is 5800mAh based on results from realme Lab. The battery rated capacity is 5600mAh. Actual battery life depends on usage conditions.

*To reach 40W fast charging power, the realme 45W Charger and the original charging cable must be used. Actual charging power may vary depending on the usage scenario.
